TURNIP SAKATA'S EARLIEST WHITE FLAT

We illustrate above something new in Japanese Turnips originated by Messrs. T. Sakata Company, viz. **Sakata's Earliest White Flat Turnip.** It possesses all the desirable qualities of Shogoin, the root is flatter, pure white; foliage fine green, very upright; growth unusually rapid. In our opinion it is more desirable for very late Spring or very early Fall planting as its growth is not retarded by hot, dry weather.

PEPPER

	Per lb.
Bell or Bull Nose, Hot	1.45

SAKATA'S FOLIAGE TURNIP IMPROVED CHOGGIN

SAKATA'S FOLIAGE TURNIP (Improved Sho-goin). The prediction of an eminent seedsman that this Turnip would soon be more popular in the southern states than the Seven Top and Purple Top is coming true. A pure white Turnip with fine upright foliage, free from sand and insects, one which seems to thrive in hot and dry weather.

The above illustration shows **Sakata's Chokurei** type of Celery Cabbage. It makes a long white open head and should be used wherever the customer or catalogue calls for Pe-Tsai.

For Wong-Bok we recommend without hesitation **Sakata's Market Pride**, illustrated on page 1.

Note the fine Onions grown from our **Genuine Sweet Spanish Valencia Onion Seed**. The critical commercial grower in California, Colorado and the eastern Onion growing sections is taking our seed because it produces heavier tonnage and plants exceptionally resistant to thrip.

To the right we illustrate **Sakata's Improved Pekin or Chihili** Celery Cabbage. This long, sure heading strain is today the most popular of all Celery Cabbages and one that should be more widely used.
